Rita Mae Brown ^{maye} once said that language is the road map of a culture and that it tells where its' people come from and where they are going. I'd like to express my opinion on the subject. 38

First of all, I'd like to address the fact that I ^{have} little to no knowledge about the history of languages, but from what I know I can say with confidence that you can indeed tell that knowing the language you can tell where the people come from. There are many instances of ~~to~~ various languages taking words, forms or even the style of speaking from others. For example, during the colonization and later waves of it in the America many words were taken from French, German and other tongues. 127

However, it cannot be said the process of languages taking from others has stopped, it's actually quite the opposite. With internet people from all over the world are able to communicate and many words, although ~~not~~ mostly English, make their way into lives of people from all around the globe. Slang can also be explored as a language evolving, with people finding new ways to use the already existent words. 196

In the end, it's without a doubt that languages can ~~the~~ tell about their history, what happens to those who use it currently, ~~and, possibly, even its' future.~~ ^{their}
